Task 4: Describe a graph/chart

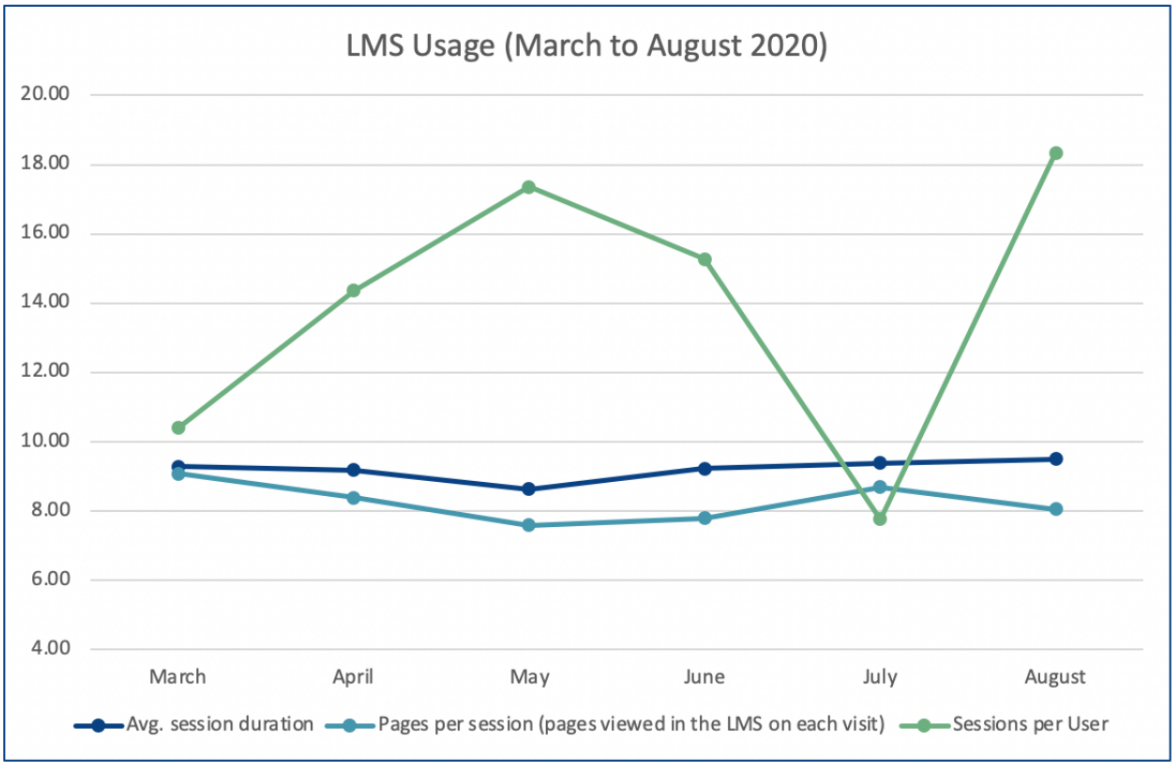
Overview:

This task aims to assess academic speaking ability in combination with the ability to interpret visual information in graph/chart format, summarizing visual information, extracting key aspects of visual information and summarizing this information to a listener in an organised way.

Key aspects of graph/chart:

- Information related to academic environment
- Require interpretation of three to four key trends in the data presented

Task:

Look at the graph below describing the LMS (Learning Management System) usage of University of Melbourne students between March (the start of online learning due to Covid-19) to August 2020. Your task is to describe the graph as if you were giving a presentation to your fellow students and your lecturer.


You have 60 seconds to look at the graph and decide what you want to say. You can start speaking when you are ready. You have 60 seconds to speak.
